

The airwaves, along with trees and water, belong to all of us and should not be exploited and used to present a narrow, one sided opinion on anything. Sinclairs license carries a responsibility to the public and should be yanked if he is not intelligent enough to know when he is violating the public trust. He in fact does know. He is purposefully, deliberately doing this and saying, "what are you going to do about it?" His actions (if carried out) can be described as unamerican, undemocratic. Please use your influence to see that this wrong is not carried out. Thank you, Carroll
